

- Phleboliths
- Triticeous cartilage and thyroid cartilage
- Calcified lymph nodes
- Tonsilloliths
- Calcified atheromatous plaque
- Antrolith
- Ossified stylohyoid ligament
- Sialoliths

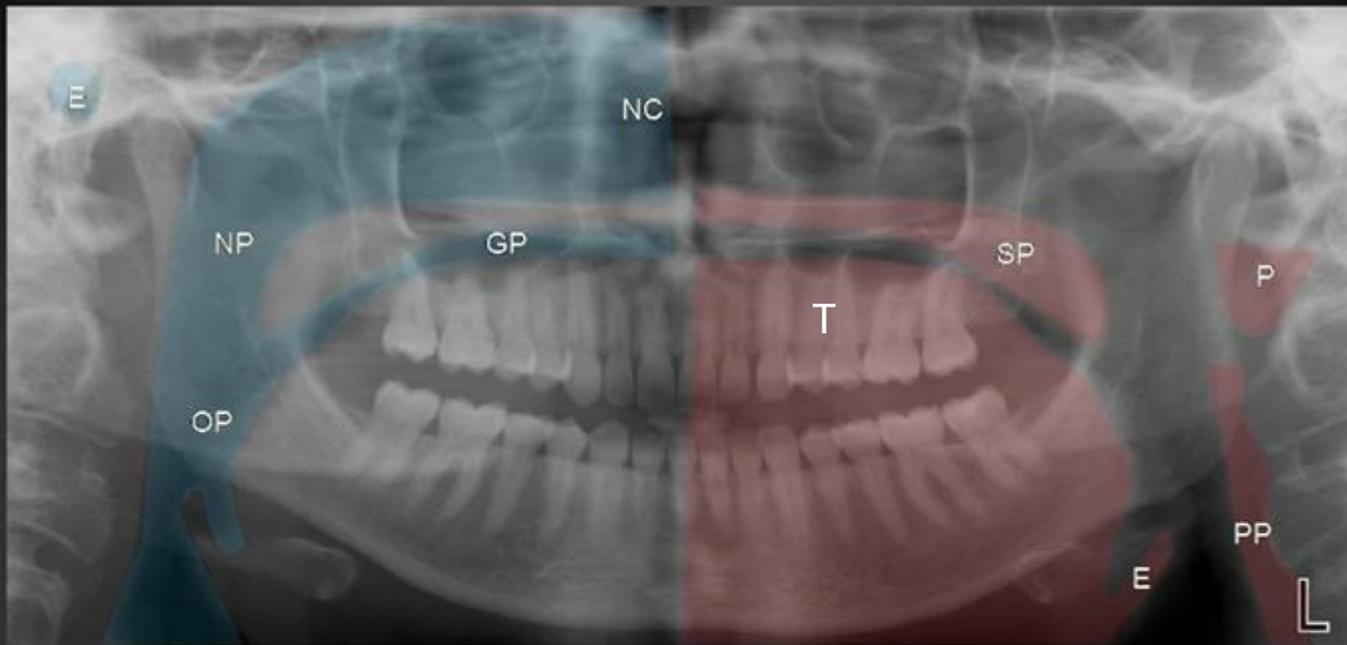

SOFT TISSUE SHADOWS

1. Nasopharyngeal air space
2. Palato-glossal air space
3. Shadow of ear
4. Glosso-pharyngeal air space
5. Soft palate
6. Epiglottis
7. Soft tissue of nose

AREAS OF RADIOGRAPHIC ARTIFACT

8. Ghost image of contralateral mandible
9. Ghost image of apron too high on shoulder
10. Ghost image of spine due to slumped position of patient.
11. Ghost image of contralateral hard palate.

NOTE: All artifact areas and shadows are bilateral

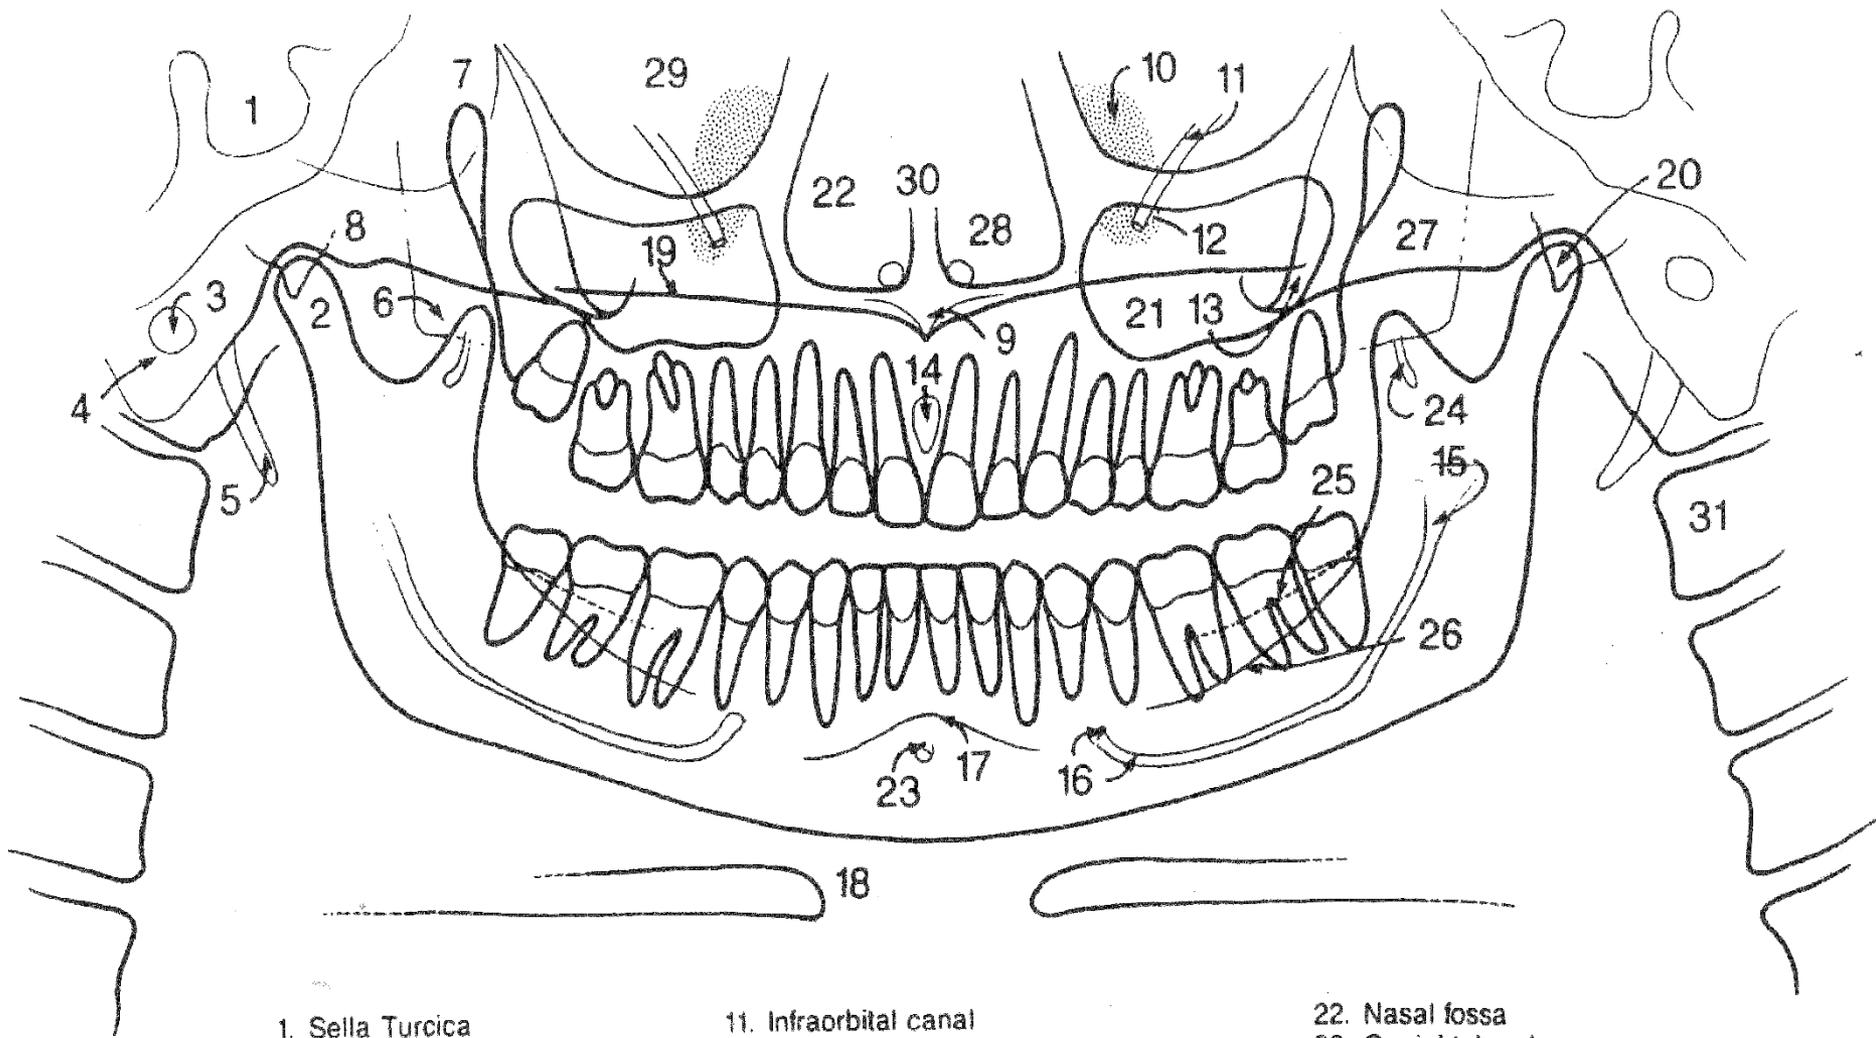

Air Shadows

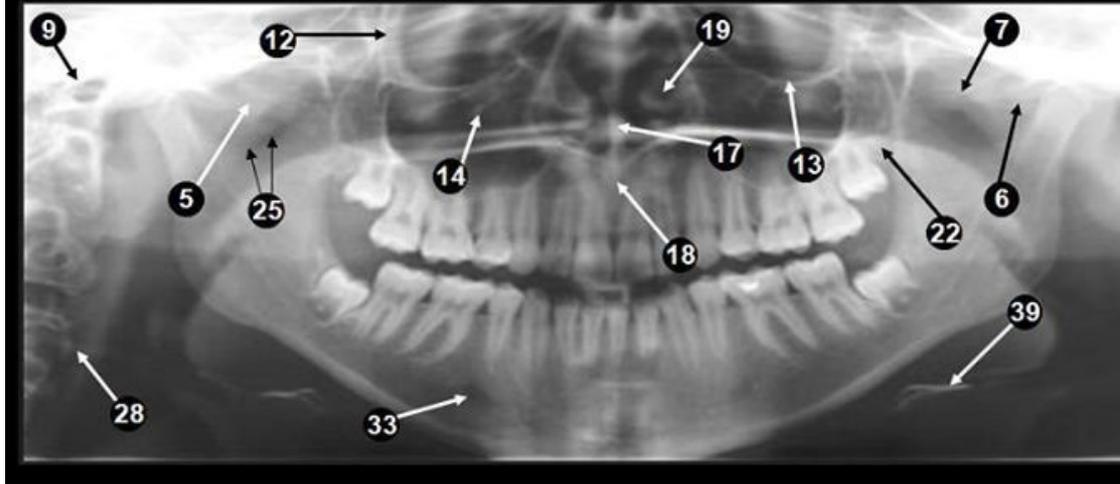

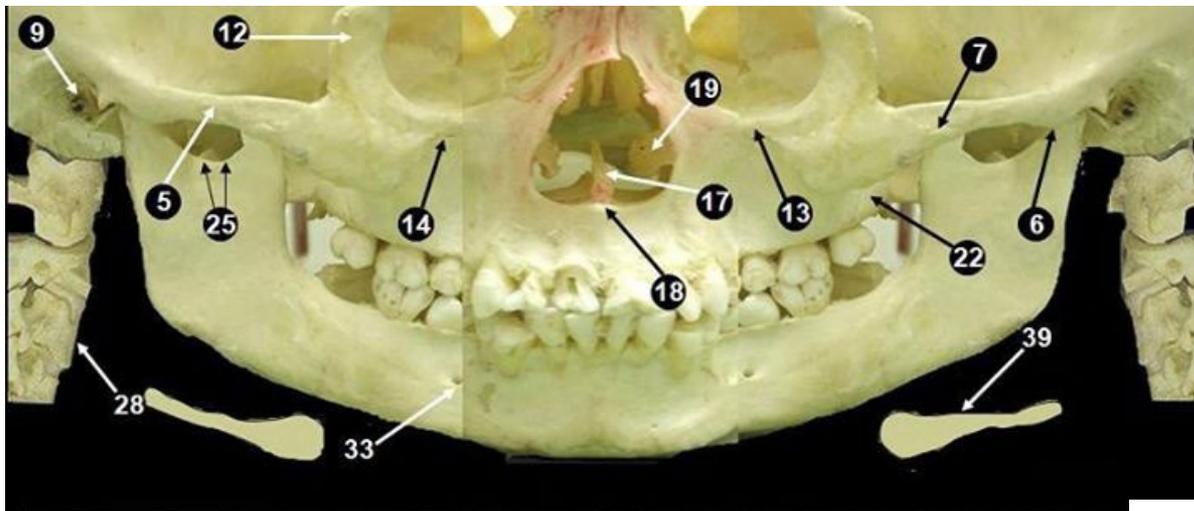

NC	nasal cavity
NP	nasopharynx
OP	oropharynx
GP	glossopharynx
E	external auditory canal

Soft tissue Shadows

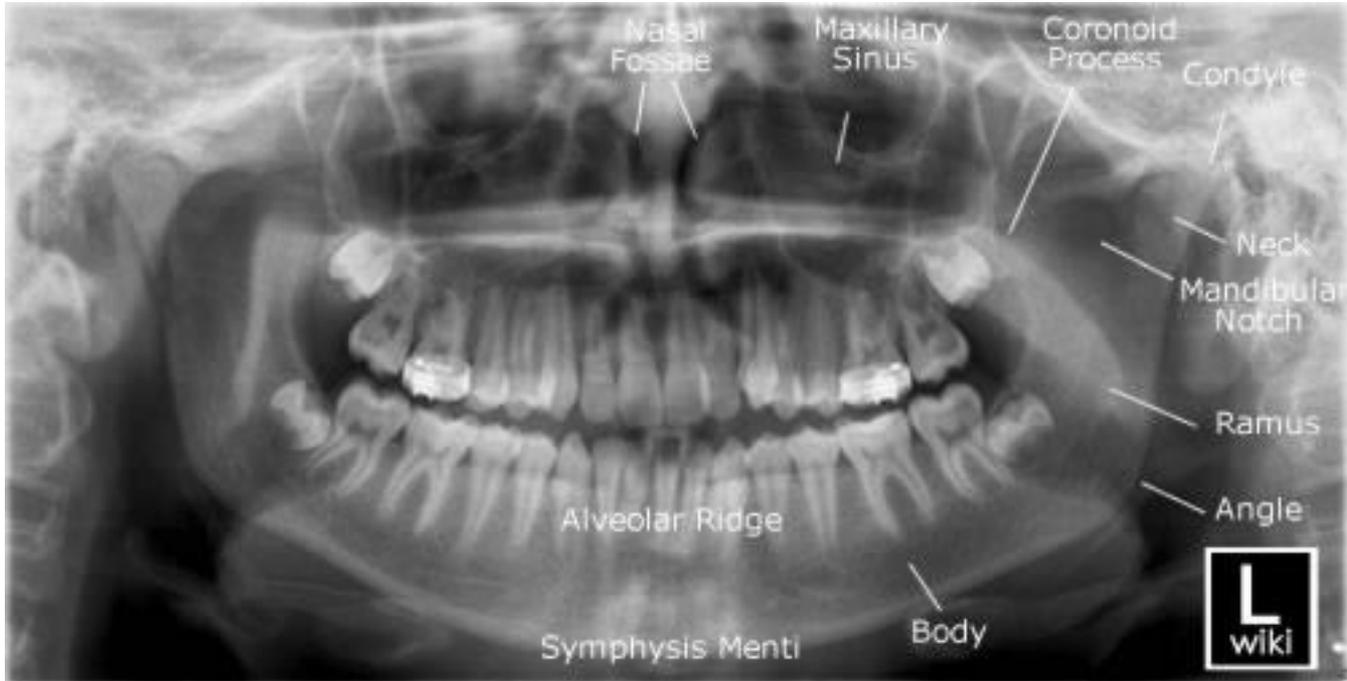

SP	soft palate
T	dorsum of tongue
P	pinna
E	epiglottis
PP	posterior pharyngeal wall

- 6. articular eminence
- 7. zygomaticotemporal suture
- 9. external auditory meatus
- 12. lateral border of the orbit
- 13. infraorbital ridge
- 14. infraorbital foramen
- 17. nasal septum
- 18. anterior nasal spine
- 19. inferior concha
- 22. maxillary tuberosity
- 25. sigmoid notch
- 28. cervical vertebrae
- 33. mental foramen
- 39. hyoid bone

Index til evaluering af rodresorption under orthodontisk behandling

Rod former:

1) short/kort 2) blunt/stump(afrundet) 3) bent/afbøjning 4) pipette

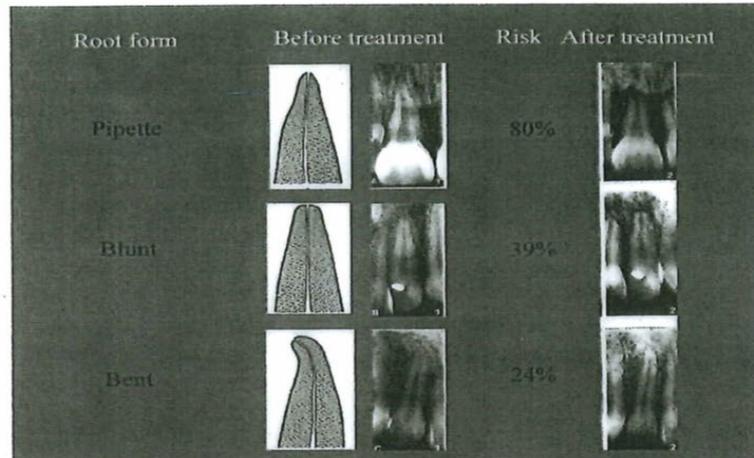

Figure 3 Risk of root resorption in relation to root form

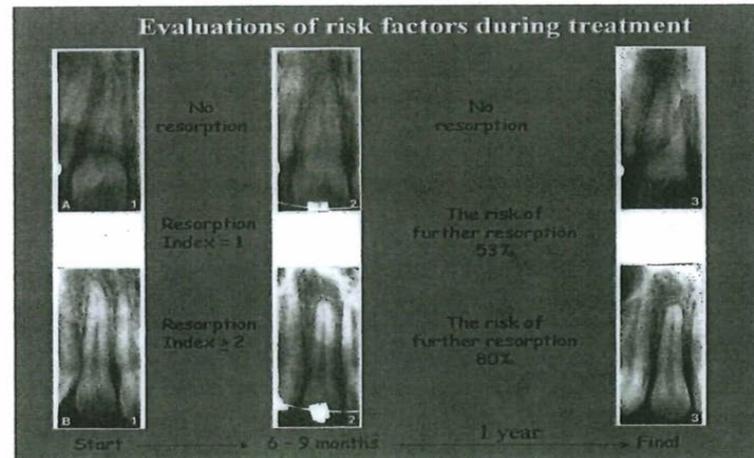

Figure 4 Risk factors during treatment
